Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Harpenau (6419102).

A housing for a dryer venting comprising;

- A top wall 22
- A bottom wall 26
- two side walls 34
- a rear wall 28 attached to the top, bottom and side walls
- The above walls are combined to define an inner space sized to house a portion of venting 72 attached to a clothes dryer
- A front face 36 extending from one of the walls
- Mustoe lacks the plurality of standoff extending rearwardly from the front face plate and having a portion; the standoff includes a hole which is adapted to receive a screw 32; Simon discloses a plurality of standoffs 50 including a hole which is adapted to receive a screw 40. The knockoff includes a beveled portion to assist in boring the standoff into the wood. See figure s 2 and 4. it would have been obvious to place the standoffs in

- any location when the same is attach to a stud or other building structure
- to rigidify and strengthen the area of attachment
- knockouts 38/42 are sized to receive a duct 72 attached to a clothes dryer 76; the knockouts are located in the top, bottom, side walls and back walls
 - a plurality of post 66 adapted to have a bracket 24 attached thereto for holding a dryer venting duct in place and stable
 - regarding the method claim, Mustoe discloses
 1. providing the above housing
 2. providing a wood stud 66 for a wall in the building wall
 3. positioning the housing so that the standoffs of Simon are aligned with the wood stud
 4. Simon discloses applying pressure against the housing to force a portion of the standoff into the stud
 5. permanently attaching the housing to the wood stud

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mustoe in view of Harpenau. Harpenau discloses a housing for a dryer venting

SERIAL NO.: 10/768222

ART UNIT: 3635

comprising top, bottom and side walls at an angle of greater than 90 degrees.

The exact angle has been considered a matter of choice. One of ordinary skill in the art would have appreciated attaching the walls at any angle that enables the intended use, function and purpose of the housing.

Applicant's arguments are moot given the new ground of rejection.

Applicant's amendment necessitated the new ground of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
